

Ingeniously simple and reliable
level measurement

Measurement Technology & Know-how

Product Portfolio

“With heart and soul – and smooth co-operation”

The UWT Management Trio

When we started 1977 with the development of our ingenious products, no one could have foreseen the unparalleled success story that followed. UWT has become one of the leading suppliers of measurement technology on the world market today for the level detection in silos and material manufacturing processes. The names Rotonivo®, Vibranivo® and NivoBob® represent quality, flexibility and reliability in over 70 countries across the world. Having successfully solved over a million applications within the bulk solids sector, UWT has expanded still further by introducing a new and innovative product range for the liquids market which is delivering reliable solutions for applications in this area.

The development, production and sales departments are located at our headquarters in Germany, with a further production site in Malta. UWT has also established successful sales offices in the USA, UK, China, India, Russia and most recently Brazil and Mexico. With this global orientation, we are able to serve and support our customers with complete competence and flexibility. From development through production to final assembly and comprehensive technical advice, we can offer a complete service from a single source. Focus is placed on delivering the highest quality products, technical expertise and a good working relationship with customers, suppliers and partners. The strongly held belief by CEO Uwe Niekrawietz is for the welfare of over 165 employees world-wide: “Healthy and happy employees can make the unbelievable happen”.

Every year, our product portfolio evolves, develops and brings about solutions for a variety of industries. As well as providing level measurement we also offer monitoring and visualisation systems, together with complete project planning. Renowned plant manufacturers and end users around the world appreciate our ability to deliver customised solutions for their applications, as well as the ease of use and durability of the UWT sensors. Our strategy in the consistent monitoring of our own steady and sustainable growth allows us to provide the best value solutions for our customers.

Headquarters in Betzigau, Germany

Awarded for innovative
industrial solutions

Our mission

We are guided by our company characteristics: responsibility, enterprising as well as challenging and stimulating. Our company values: **quality**, **reliability**, **flexibility** form our strategic direction and guide us when dealing with colleagues, customers or business partners alike.

	UWT Mission	
	Quality:	Product performance 99.8 %
	Reliability:	Competent employees and long-lasting products
	Flexibility:	Customer orientation and satisfaction

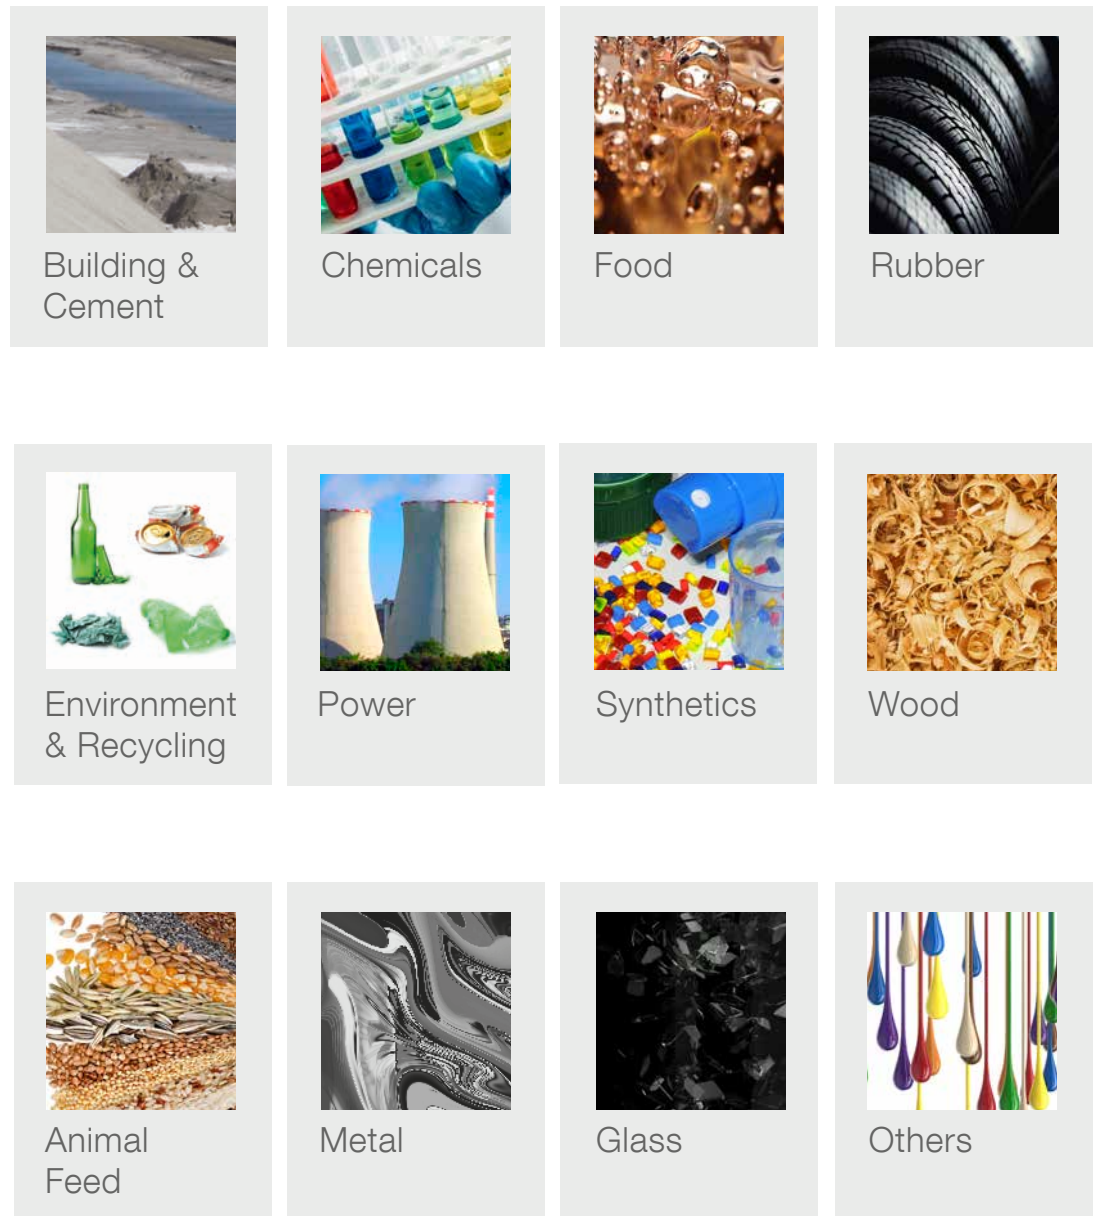

Your team for innovative measurement technology

Over the years, as a German medium-sized enterprise we have become the world's competent partner for level measurement technology. A company reaches such a position only if the following key elements interact: Sound management, good understanding of the needs of the markets, innovative product solutions, skillful investment and above all, committed and dedicated employees.

Our products

Rotonivo®

Rotary Paddle Level Switch for **SOLIDS**

A motor driven shaft causes a vane to rotate. Once the material level reaches the vane, thereby preventing further rotation, switches are activated which result in an output signal and the motor stops. When the vane is free again from material, the output signal is reset and the motor driven shaft rotates again.

RN 3000

RN 4000

RN 6000

RN 3002 Tube

RN 3002 Rope

Our Solutions for:

- Strong caking
- Dusty environments
- Abrasive materials
- Extreme process temperature
- Over pressure and low pressure environments
- Heavy mechanical loading
- Electrostatic charging
- Variable parameters
- Explosive environments
- Hygienic applications

Special Features:

- ✓ Universal voltage electronics
- ✓ Adjustable sensitivity (≥ 15 g/l)
- ✓ Rotation principle unaffected by caking
- ✓ Robust aluminum die cast housing
- ✓ Protected motor (friction clutch & double bearing)
- ✓ Modular design
- ✓ Tube and metal rope extension
- ✓ Temperature range from -40°C to $+1,100^{\circ}\text{C}$
- ✓ High quality grade stainless steel (process)
- ✓ Long lifespan (brushless synchronised motor)
- ✓ RN 6000 is world's first rotating level limit switch compliant to **SIL 2**

Vibranivo®

Vibrating Level Switch for SOLIDS & SEDIMENTS IN LIQUIDS

Electronically stimulated piezos cause the fork to vibrate. As soon as the sensor is covered with material, the vibration is dampened and the resulting electrical current change causes the output signal to switch. Once the material level falls below the sensor it is free to vibrate again and the output signal is reset.

VN 1000

VN 2000

VN 4000

VN 5000

VN 6000

Remote Version

Our Solutions for:

- Extremely light product density
- Pneumatic filling
- Process overpressure
- Limited space
- Vibration within the vessel
- High reliability requirements
- High hygienic requirements
- Explosive environments
- Sediment levels in liquids

Special Features:

- ✓ 2-wire technology
- ✓ Very high sensitivity (< 5g/l - Vibrasil®)
- ✓ Surface roughness of 0.75 µm
- ✓ High quality material in the process (SS 316L)
- ✓ Cable and tube (screwed) extension
- ✓ Suitable for overpressure up to 16 bar
- ✓ Temperature range from -40 °C to +150 °C
- ✓ Extremely robust short version
- ✓ PFA and Teflon coating
- ✓ NAMUR Standard
- ✓ Level control of sediments in liquids

Mononivo®

Vibrating Level Switch for SOLIDS

Electronically stimulated piezos cause the single rod probe to vibrate. When the material covers the sensor, this causes the vibration to stop and a voltage change is caused within the piezo elements. This is electronically registered and causes the output signal to switch.

MN 4020

MN 4030
Tube

MN 4040 Tube
screwed

Our Solutions for:

- Light products from 20 g/l
- Powdery material with strong caking properties
- Coarse-grained granulate
- Pneumatic filling
- Process overpressure
- Limited space
- Overfill detection within tubes and shafts
- Vibration within the vessel
- High safety standard
- High hygienic requirements
- Explosive environments

Special Features:

- ✓ Compact limit switch with threads from 1"
- ✓ Sensitivity adjustable in 4 settings
- ✓ High surface quality
- ✓ High quality material in the process (SS 316L)
- ✓ Heavy mechanical loading
- ✓ Robust version for overpressure up to 16 bar
- ✓ Temperature range from -40 °C to +150 °C
- ✓ Tube extension (screwed)

RFnivo®

Capacitance Level Switch for SOLIDS

The capacitive level limit switch is automatically calibrated to a reference capacitance of an empty vessel. If the probe is covered by the product, the measured capacitance changes through the dielectric and a switching signal is activated. The integrated "Active Shield" technology ensures high reliability even for products that cause caking.

RF 3100

RF 3200

RF 3300 Temp.

Remote Version

Our Solutions for:

- Heavy materials
- Dusty environments
- Abrasive and aggressive media
- Extreme process temperatures
- Positive and negative pressure
- Caking material
- Vibration in the vessel
- Hazardous areas
- EHEDG applications

Special Features:

- ✓ Very high sensitivity ($DK \geq 1.5$)
- ✓ High mechanical load
- ✓ Simple to install and set up
- ✓ High quality process materials (SS 316L, ceramics, PPS)
- ✓ Rod and metal rope extension
- ✓ Robust version for overpressure up to 25 bar
- ✓ Temperature range from -40°C up to $+500^{\circ}\text{C}$
- ✓ RF 3100 PROTECTION PLUS version with anti-corrosive coating (PFA Teflon®)

RFnivo®

Inverse Frequency
Shift Technology

Capacitance Level Switch for LIQUIDS & INTERFACE

The capacitive measuring limit switch responds to the change in capacitance at the probe, which is detected by the change in the oscillating frequency. The integrated "Active Shield" technology ensures high reliability even for products that cause caking.

RF 8100 Rod

RF 8100 Rope

RF 8200 Temp.

Our Solutions for:

- All types of liquids
- Applications with condensation
- Very strong caking
- High process temperatures
- Corrosion resistance in aggressive materials
- Vibrations within the process
- High safety standard
- Explosive environments
- Interface measurement

Special Features:

- ✓ Functionality independent of silo wall
- ✓ Temperature range from -40 °C up to +400 °C
- ✓ Robust version for overpressure up to 35 bar
- ✓ Digital electronics with Profibus PA, integrated display and operating menu
- ✓ Potted electronics
- ✓ Very high sensitivity ($DK \geq 1.5$)
- ✓ Rod and metal rope extension (up to 25 m)
- ✓ WHG certification
- ✓ Certification accord. Lloyd's Register

Capanivo®

Capacitance Level Switch for SOLIDS

The electrodes in the sensor form a capacitor. If the product comes into contact with the sensor, the capacitance changes and the electronics converts it into a switching signal. The integrated "Active Shield" technology allows this system to be used in particularly adhesive materials.

CN 4020

CN 4020 Temp.

CN 4030 Tube

CN 4050 Cable

Our Solutions for:

- Light materials
- Dusty environments
- Pneumatic filling
- Overpressure
- Very strong caking
- Corrosion resistance for aggressive material
- High process temperature
- High standard of safety requirement
- Explosive environments

Special Features:

- ✓ Very high sensitivity ($DK \geq 1.6$)
- ✓ Functionality independent of silo wall
- ✓ Range of process connections
- ✓ Adjustable switching delay
- ✓ Variety of mechanical versions
- ✓ Tube and cable extension
- ✓ Overpressure up to 25 bar
- ✓ Temperature range from -40°C to $+180^{\circ}\text{C}$
- ✓ Food compliant version

Capanivo®

IO-Link

Capacitance Level Switch for LIQUIDS & INTERFACE

The electrodes in the sensor form a capacitor. If the product comes into contact with the sensor, the capacitance changes and the electronics converts it into a switching signal. Available as version with stainless steel or synthetic housing.

The integrated "Tip Sensitivity" and "Active Shield" technology guarantee a high level of functional reliability even for products that cause caking.

CN 7120

CN 7121

CN 7130 Tube

CN 7150 Cable

Our Solutions for:

- All types of liquids
- Strong caking
- Limited space
- Corrosion resistance in aggressive materials
- High safety standard
- High hygiene requirements
- Explosive environments
- Leakage detection
- Interface measurement

Special Features:

- ✓ Available with two different housing sizes
- ✓ Compact limit switch from 1/2" connection thread
- ✓ For universal use
- ✓ Installation in all kinds of tanks
- ✓ For use in metallic and non-metallic containers
- ✓ Very high sensitivity (DK ≥ 1.5)
- ✓ Inverse Frequency Shift Technology
- ✓ Stainless steel and synthetic version available
- ✓ Temperature range from -40 °C up to +125 °C (CIP suitable up to 150 °C)
- ✓ IO-Link with PNP, NPN, push pull signal output
- ✓ 8/16mA or 4...20mA continuous current output
- ✓ WHG and VLAREM certification

Capanivo®

Inverse Frequency
Shift Technology

Capacitance Level Switch for LIQUIDS & INTERFACE

The electrodes in the sensor form a capacitor. If the product comes into contact with the sensor, the capacitance changes and the electronics converts it into a switching signal.

The integrated "Tip Sensitivity" technology guarantees a high level of functional reliability even for products that cause caking.

CN 8100

CN 8100

Our Solutions for:

- All types of liquids
- Strong caking
- Vibrations within the process
- Corrosion resistance in aggressive materials
- High safety standard
- Explosive environments
- Leakage detection
- Interface measurement

Remote Version

Variety of
mechanical
designs

Special Features:

- ✓ For universal use in containers up to 30m
- ✓ Installation in all kinds of tanks
- ✓ For use in metallic and non-metallic containers
- ✓ Very high sensitivity ($DK \geq 1.5$)
- ✓ Potted electronics
- ✓ Digital electronics with Profibus PA, integrated display and operating menu (optional)
- ✓ Robust version for overpressure up to 25 bar
- ✓ Temperature range from -40°C up to $+125^{\circ}\text{C}$
- ✓ WHG certification
- ✓ Certification accord. Lloyd's Register
- ✓ SensGuard cover (optional)

NivoCapa®

Inverse Frequency
Shift Technology

Capacitance Level Transmitter for LIQUIDS & INTERFACE

The sensor measures the electrical capacity of the level in the tank. The integrated "Active Shield" technology allows this system to be used in particularly adhesive materials.

NC 8100 Rod

NC 8100 Coax

NC 8100 Rope

Our Solutions for:

- All types of liquids
- Applications with condensation
- Very strong caking
- Corrosion resistance in aggressive materials
- High safety standard
- Explosive environments

Special Features:

- ✓ High measurement accuracy
- ✓ Installation in all kinds of tanks
- ✓ For use in metallic and non-metallic containers
- ✓ 2-wire technology (output signal 4...20 mA according to NAMUR NE 43)
- ✓ Very high sensitivity ($DK \geq 1.5$)
- ✓ Rod and metal rope extension (up to 25 m)
- ✓ Robust version for overpressure up to 35 bar
- ✓ Temperature range from -40°C up to $+200^{\circ}\text{C}$
- ✓ Quick response time
- ✓ PFA Teflon® coating
- ✓ Programmable electronics with buttons and LC display for level, damping, diagnosis etc.
- ✓ Certification accord. Lloyd's Register

NivoBob®

Electromechanical Plumb Bob for SOLIDS & LIQUIDS & SEDIMENTS IN LIQUIDS

A sensor weight attached to either a metal tape or rope is electromechanically lowered into the vessel. Once the sensor weight rests on the material, the winding direction of the motor changes and the sensor weight is rewound to the upper stop position. As the weight is lowered, the distance is electronically measured.

Microprocessors convert the measured distance together with the programmed silo geometry into a volumetric output signal. This signal is updated each time the sensor weight is lowered.

NB 3000

NB 4000 Aiming flange

Sensor weights

Our Solutions for:

- Strong caking
- Material with changing temperature and humidity
- Electrostatic charging
- Heavy material as well as light solids
- Limited space
- Low dielectric constant
- High process temperatures
- Large measurement distances
- Explosive environments

Special Features:

- ✓ High sensitivity (≥ 20 g/l) dep. on sensor weight
- ✓ Rope and tape version
- ✓ Measurement range of up to 50m
- ✓ Overpressure version up to 1.7 bar
- ✓ Temperature range from -40°C to $+250^{\circ}\text{C}$
- ✓ Service life up to 500,000 cycles of tape version
- ✓ Integrated tape cleaner
- ✓ Diagnostics function
- ✓ Simple installation and set up
- ✓ Comm. via Modbus RTU or Profibus DP

NivoRadar®

Radar Sensor for SOLIDS

A high frequency signal is transmitted with a very small beam angle with two-wire technology. The signal is reflected by the bulk material and received back to the sensor. The frequency difference, which is directly proportional to the distance, is then further processed and output as the level signal. The small beam angle makes the use in tall narrow silos possible and facilitates the installation and alignment of the sensor.

Our Solutions for:

- Very light material
- Various application industries
- Dusty environment
- Measurement range of up to 100m
- Use within tall, narrow silos
- Optimum reflection of the bulk solids material
- Corrosion resistance for aggressive material
- High process temperature
- Perfect positioning
- Explosive environments

Special Features:

- ✓ Signal processing with Process-Intelligence-Software
- ✓ 2-wire technology
- ✓ High sensitivity ($DK \geq 1.6$)
- ✓ 78GHz technology
- ✓ 4° narrow beam angle
- ✓ Lens antenna and mounting flange are flush
- ✓ Integrated lens cleaner
- ✓ Robust stainless steel housing IP68
- ✓ Aiming flange model
- ✓ Temperature solution up to +200 °C
- ✓ Quick Start Wizard
- ✓ Simple, six-step commissioning

NivoRadar®

Configuration via
UWT LevelApp

Radar Sensor for SOLIDS

A high frequency signal is transmitted with a very small beam angle with two-wire technology. The signal is reflected by the bulk material and received back to the sensor. The frequency difference, which is directly proportional to the distance, is then further processed and output as the level signal. Thanks to the high degree of protection for bulk solids applications, the sensor is ideal across all industries. Installation is also possible outdoors on free-standing stockpiles.

NR 4100

Mounting thread

Measuring range up to 30m

Mounting flange

Measuring range up to 30m

Our Solutions for:

- Lightest and heavy bulk goods
- Dusty environments
- Condensation and strong caking
- Use in narrow, medium-sized silos up to 30m
- Optimum reflections of bulk material with material cone
- Corrosion resistance in aggressive materials
- Potentially explosive areas
- Individual positioning of the sensor

Special Features:

- ✓ 2-wire technology
- ✓ Compact with 1" connection thread (PVDF)
- ✓ Various mounting accessories
- ✓ Measurement up to antenna tip (no blocking distance)
- ✓ High sensitivity (DK value ≥ 1.1)
- ✓ 80 GHz technology
- ✓ 4° narrow beam angle
- ✓ Potted PVDF housing
- ✓ Ingress protection IP66/ IP68
- ✓ Temperature solution -40°C to +80°C
- ✓ High measurement accuracy ($\pm 2\text{mm}$)
- ✓ Quick-Start Wizard
- ✓ WHG certification

NivoRadar®

Configuration via
UWT LevelApp

Radar Sensor for LIQUIDS

A high frequency signal is transmitted with a very small beam angle with two-wire technology. The signal is reflected by the bulk material and received back to the sensor. The frequency difference, which is directly proportional to the distance, is then further processed and output as the level signal. The sensor is ideal for use in water treatment tanks and, due to its design, is also suitable for acids and alkalis. It is also possible for measurement to be made through the tank top of plastic containers.

NR 7100

Without Display

Measuring range up to 8m

NR 7200

With Display

Measuring range up to 15m

Plug on Display:

Optional display for setting and reading the sensor values directly on the device

Our Solutions for:

- Highly viscous liquids
- Very strong caking
- Steam, outgassing and condensation
- Use in process and storage tanks up to 15m
- Precise measurement readings in conveying materials
- Corrosion resistance in aggressive materials
- Potentially explosive areas
- Individual positioning of the sensor

Special Features:

- ✓ 2-wire technology
- ✓ Lens antenna is flush
- ✓ Compact with 1 1/2" connection thread (PVDF)
- ✓ Various mounting accessories
- ✓ Measurement up to the antenna tip (no blocking distance)
- ✓ High sensitivity (DK value ≥ 1.1)
- ✓ 80 GHz technology
- ✓ 8° narrow beam angle
- ✓ Potted electronics
- ✓ Ingress protection IP66/ IP67
- ✓ Temperature solution -40 °C to +80 °C
- ✓ High measurement accuracy ($\pm 2\text{mm}$)
- ✓ Quick-Start Wizard
- ✓ WHG certification

NivoGuide®

Customizable
extensions

Guided Wave Radar Sensor for SOLIDS

High-frequency microwave pulses are coupled to a cable or rod and guided along the probe. The emitted pulse is reflected by the product surface. The time difference between the transmitted and reflected pulse is converted to a level.

NG 3100 Rod

NG 3100 Rope

Our Solutions for:

- Bulk materials with strong withdrawal forces
- Strong caking
- Abrasive materials
- Dusty environment
- Condensation and foam generation, steam
- Large measurement distances
- Explosive environments

Integrated display and adjustment module

Lid with

Special Features:

- ✓ Modular design
- ✓ Very high sensitivity ($DK \geq 1.4$)
- ✓ Rod and rope extension (up to 75 m)
- ✓ Temperature range from -196°C up to $+450^\circ\text{C}$
- ✓ Coaxial version
- ✓ For extremely high pressure up to 400 bar
- ✓ Condensate cone
- ✓ False echo suppression
- ✓ Second line of defense (optional)
- ✓ High measuring accuracy ($\pm 2\text{mm}$)
- ✓ Large measuring range (low blocking distance)
- ✓ Boiler approval

NivoTec®

Level monitoring and visualisation

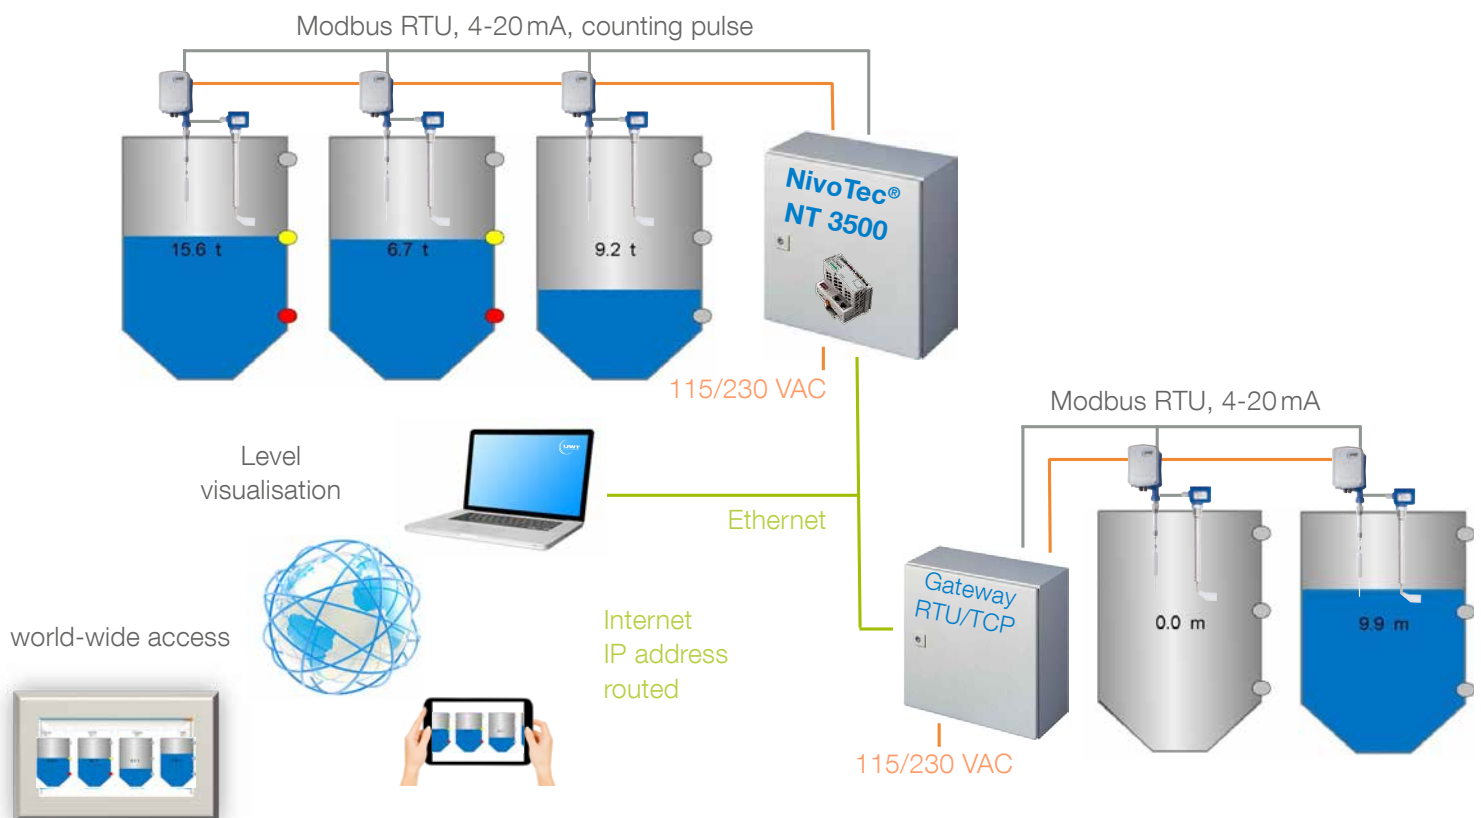

NT 2000 Level indication integrated within a control cabinet

- Indication of level in weight, height, percentage or volume via LED display
- For evaluating the output signal from any level sensors with analog signal 4-20 mA
- Fill control by silo full detectors
- Truck module for tanker trucks to prevent overfilling of silos
- Clear and easy management of the different indicators
- Complete system with project specific electrical plans

NT 3500 Level visualisation from a PC via webserver

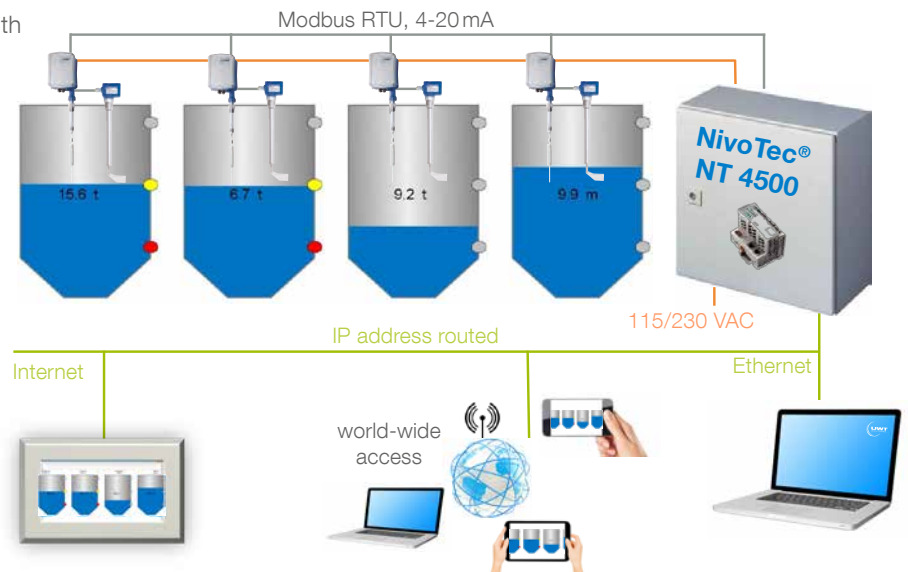

- Level visualisation via webserver
- Password-protected for various use levels with standard browser software on the Ethernet
- For data storage and downloads, trend data and evaluation
- World-wide remote access to the visualisation software
- Fill control by alarm full detection, pinch valve control within filling tubes and recognition of tanker coupling
- For integration of truck operating modules at filling station stage
- Level- and alarm-message via e-mail
- Interfaces for level sensors, 4-20mA, Modbus RTU, Ethernet TCP, counter signal, relay
- Complete system with project specific electrical plans
- Individual project planning

Example of a complete visualisation system for NT 3500

NT 4500 Level visualisation from a PC via webserver

- Standardised, cost effective level visualisation via webserver
- Password-protected for various use levels with standard browser software on the Ethernet
- For data storage and downloads, trend data and evaluation
- Fill control by alarm full detection
- Level- and alarm-message via e-mail
- Interfaces for level sensors, 4-20mA, Modbus RTU
- Complete system with electrical plans

Example of a complete visualisation system for NT 4500

NT 4600 Level visualisation via 7" touch panel

- Visualisation and operation via 7" touch panel
- Data in percentage, height, volume or weight
- Trend display, data storage
- Evaluation of the analogue 4-20mA signals of any sensors, as well as Modbus RTU of the UWT-systems
- Fully wired whether mounted or within control cabinet

NT 4700 Level indicator with digital display

- Digital display hardwired into the terminal box
- Evaluation of level signal 4-20mA of any sensors
- Level indication via 4-digit LED display in weight, height, percentage or volume
- Version for suitable for NivoBob® with "Start measurement" button and LED for "sensing weight in the upper end position"

NT 4900 Level indicator with digital display

- Built-in digital display module
- Level indication in weight, height, percentage or volume
- Yellow LED-Display, 4-digit, 7 segment
- Easy to use button operation on face of unit
- Interface 4-20mA

Interface Solutions

Resistant
stainless steel
probes

Interface measurement of solids in liquids

The detection of bulk solids in liquids as well as sludge levels usually takes place in sediment containers, filters or inclined clarifiers. Typical areas of application are in the metal industry, in chemical plants, lime or gravel works and the sewage industry.

Our Solutions for:

- Continuous level measurement:
Lot system NivoBob® series NB 3300/3400
- Point level detection:
Vibration fork Vibranivo® series VN 1000/5000

Special Features:

- ✓ Adjustable sensitivity
- ✓ Robust design
- ✓ Unaffected by dirt and moisture
- ✓ Reliable and precise detection of solids

Interface measurement of liquid layers

In industry applications where a separating layer between two different liquids or a liquid and foam layer is measured, both the capacitance measuring principle and the guided wave radar technology are used.

Our Solutions for:

- Continuous level measurement:
Capacitance level transmitter NivoCapa® series NC 8000
TDR sensor NivoGuide® series NG 8000
- Point level detection:
Capacitance level switch Capanivo® series CN 7000/8000
Capacitance level switch RFnivo® series RF 8000

Special Features:

- ✓ Adjustable sensitivity
- ✓ High measurement accuracy
- ✓ Chemical resistant materials
- ✓ Detection of total level, separation layer and thickness of upper layer

Webshop

Quick & easy

Simply find, compare and configure the right sensor for the relevant application yourself. The competent UWT sales and service team provides support.

Measurement

☐ Point level

☐ Content

☐ Interface

Electronic

Power supply:

☐ 230VAC _____ Hz

☐ 24VAC _____ Hz

☐ 115VAC _____ Hz

☐ 24VDC _____

☐ 48VAC _____ Hz

☐ other _____

*For AC, please
specify additionally
mains frequency!*

Signal output/Communication:

☐ DPDT Relay

☐ HART

☐ SPDT Relay

☐ Profibus DP

☐ PNP

☐ Modbus RTU

☐ NPN

☐ IO-Link

☐ 4-20 mA

☐ other _____

☐ 20-4 mA

Material conditions

Material being measured: _____

Material max temperature: _____ °C / _____ °F

Density: _____ g/l / _____ lb/ft³

Particle size: _____ mm / _____ in

Viscosity: _____ Pa.s

Conductivity: _____ S/m

Dielectric constant: _____

Conditions:	<input type="radio"/> powder	<input type="radio"/> granular	<input type="radio"/> slurry/liquid
Flowability:	<input type="radio"/> normal	<input type="radio"/> viscous	<input type="radio"/> subject to bridging
Humidity (solids):	<input type="radio"/> none	<input type="radio"/> light	<input type="radio"/> strong
Build-up:	<input type="radio"/> none	<input type="radio"/> light	<input type="radio"/> strong
Dust:	<input type="radio"/> none	<input type="radio"/> light	<input type="radio"/> strong
Steam:	<input type="radio"/> none	<input type="radio"/> light	<input type="radio"/> strong
Abrasive:	<input type="radio"/> yes	<input type="radio"/> none	
Corrosive:	<input type="radio"/> yes	<input type="radio"/> none	

Other characteristics of the material: _____

Application details tank/container

Material: _____

Use/Installation: ☐ process ☐ storage ☐ conveying

Installation position sensor: ☐ from the top ☐ from the bottom ☐ from the side

Profile: ☐ rectangular ☐ conical ☐ round

☐ cylindrical standing ☐ cylindrical horizontal ☐ other (drawing)

Bottom: ☐ flat ☐ conical ☐ domed

Top: ☐ flat ☐ conical ☐ domed

Dimensions:

Container: height: _____ mm / _____ in (without bottom & top)

width: _____ mm / _____ in

length: _____ mm / _____ in

Bottom: height: _____ mm / _____ in

Top: height: _____ mm / _____ in

Process connection: flange: _____

thread: _____

height nozzle: _____

height socket: _____

other: _____

Agitator: ☐ yes ☐ none *If yes, please provide drawing*

Equipment: ☐ yes ☐ none *If yes, please provide drawing*

Filling (solids): ☐ pressure conveying ☐ vacuum conveying

☐ conveyor belt ☐ chain conveyor

conveyor screw

Filling: maximum height _____ m / _____ in

The process in detail

Process pressure: min. _____ bar / _____ psi max. _____ bar / _____ psi

Process temperature: min. _____ °C / _____ °F max. _____ °C / _____ °F

Ambient process temperature outside: _____ °C / _____ °F

Vibrations: ☐ none ☐ light ☐ strong

Certificates

☐ DustEx ☐ GasEx ☐ other

Required approval: _____

Preferred measuring principle: _____

Special features of the application: _____

Global Partner for ingeniously simple and reliable level measurement
