

Test Kit - 983v2 & 984v2

Product Code: 983V2-984V2-KIT

The Meech 983v2 & 984v2 test kit gives operators & maintenance staff the ability to diagnose static related issues and monitor the performance of their ionising equipment.

The model 983v2 Static Locator features a large LCD display for clear reading of static voltages. The model 984v2 is a true ion detector for both AC and pulsed DC ionisers. LED's show the presence, or not, of ions. Decreased detection range indicates the need to clean ionisers.

Please see individual data sheets for 983v2 and 984v2 for more detailed information.

Features

All in one test kit

Benefits

Full test kit, as used by Meech engineers. In one carry case.

Technical Characteristics

Weight	715g
Battery	Both operate from 2 x AA alkaline batteries
Dimension (mm)	235 x 200 x 55
